GENERAL MILLS

Regarding: Totino's ® Party Pizza, Cheese 42800-11300

Ingredients that qualify as "Creditable Grains" are defined by USDA in the Food Buying Guide for Child Nutrition Programs, section 3 (Grains/Breads).

The ingredients in this product that qualify as creditable include:

1. Enriched Flour

While the specific amount of each ingredient is considered proprietary, I can provide the total amount. The sum of these grain ingredients provides 39.02 grams of creditable grain in a 139 gram serving.

Since 14.75 is considered 1 bread equivalent (defined by USDA) 39.02/14.75 = 2.64 = **2.5 bread equivalents.**

Let me know if you need more clarification.

Sincerely,

Marie Hanson
Manager QRO Labeling
Marie.Hanson@genmills.com

| Snack | 1-2 | 3-5 | 6-12 |
|---|---|---|---|
| Meat/meat alternate- # pieces you would need to offer | Not credible | | |
| Grain/ bread amount required | ½ slice | ½ slice | 1 slice |
| Grain-# pieces you would need to offer | ¼ pizza | ¼ pizza | ½ pizza |
| Lunch/Supper | | | |
| Meat/meat alternate- # pieces you would need to offer | Not credible | | |
| Grain/ bread amount required | ½ slice | ½ slice | 1 slice |
| Grain-# pieces you would need to offer | ¼ pizza | ¼ pizza | ½ pizza |

If you look at the Canadian Bacon party pizza as an example, it says there are 40.93 grams of creditable grain in a 147 gram serving, which is 2.75 bread equivalents. Then if you look at the Nutrition Facts Panel that was in the info packet we initially sent to you (that was missing pages), it shows that a 147 gram serving is half a pizza. So half of one pizza would be 2.75 bread equivalents.

With each pizza variety, you'll need to compare the Child Nutrition letter with the Nutrition Facts Panel, but most – if not all – have 1 serving being equal to half the pizza. Hopefully that clarifies things, but if you have any questions at all please don't hesitate to ask.

GENERAL MILLS

Regarding: Totino's ® Party Pizza®, 3 Cheese 42800-115201

Ingredients that qualify as "Creditable Grains" are defined by USDA in the Food Buying Guide for Child Nutrition Programs, section 3 (Grains/Breads).

The ingredients in this product that qualify as creditable grains include:

1. Enriched Flour

While the specific amount of each ingredient is considered proprietary, I can provide the total amount. The sum of these grain ingredients provides 38.80 grams of creditable grain in a 138 gram serving.

Since 14.75 is considered 1 bread equivalent (defined by USDA) 38.80/14.75 = 2.63 = 2.5 bread equivalents.

Let me know if you need more clarification.

Sincerely,

Marie Hanson

| Snack | 1-2 | 3-5 | 6-12 |
|---|---|---|---|
| Meat/meat alternate- # pieces you would need to offer | Not credible | | |
| Grain/ bread amount required | ¼ slice | ½ slice | 1 slice |
| Grain-# pieces you would need to offer | ¼ pizza | ¼ pizza | ½ pizza |
| Lunch/Supper | | | |
| Meat/meat alternate- # pieces you would need to offer | Not credible | | |
| Grain/ bread amount required | ½ slice | ½ slice | 1 slice |
| Grain-# pieces you would need to offer | ¼ pizza | ¼ pizza | ½ pizza |

If you look at the Canadian Bacon party pizza as an example, it says there are 40.93 grams of creditable grain in a 147 gram serving, which is 2.75 bread equivalents. Then if you look at the Nutrition Facts Panel that was in the info packet we initially sent to you (that was missing pages), it shows that a 147 gram serving is half a pizza. So half of one pizza would be 2.75 bread equivalents.

With each pizza variety, you'll need to compare the Child Nutrition letter with the Nutrition Facts Panel, but most – if not all – have 1 serving being equal to half the pizza. Hopefully that clarifies things, but if you have any questions at all please don't hesitate to ask.

Christy
